

Request for Winter Water Connection

Beulah Camp & Conference Center

Lease Holder Name: _____ Lot #: _____

Permanent Address: _____

Telephone: _____ Email: _____

My signature below indicates that I understand and am in full agreement with the following provisions:

1. Any and all costs related to the installation of winter water are at my expense, except for the additional cost of a larger pipe size for additional cottages over time. Beulah Camp will pay the difference in this cost (larger pipe minus single lot pipe size), as quoted at the time of installation.
2. If I am connecting to an existing winter water line for which other cottage owners have borne the expense, I am responsible for: 1. The cost from the nearest point of connection; and 2. A one-time \$1,500 hook-up fee.
3. If other lot holders connect to a winter water line which was added at my expense (*AFTER* November 2015), I will be credited \$1,500 for each additional lot holder. This credit will only be provided upon receipt of the documented expense incurred by the lot holder. The total aggregate reimbursement may equal but will not exceed the initial cost of my winter water installation.
4. All installation work is to be done by Donald's Excavating of Brown's Flat, who will bill me directly in this matter. The work is to be done to specifications indicated by Donald's Excavating in consultation with the Beulah Camp Caretaker.
5. Once winter water is installed, I am responsible for any maintenance and/or repairs required on water and/or sewer lines running from the main lines into my cottage/RV.
6. In recognition of the expanded year-round service, my annual lot lease fee for water and sewer provision will be \$100/year (subject to periodic adjustment).
7. If other lot holders subsequently connect to winter water beyond my location, I am not entitled to any reimbursement from them for the cost I incurred in bringing winter water to my lot.
