

**Request for Winter Water Connection
Beulah Camp & Conference Center**

Lease Holder Name: _____ Lot# _____

Permanent Address: _____

Telephone: _____ Email: _____

1. A request form for winter water must be completed and approved by Beulah Camp and Conference Center before any connections are made to a new or existing facility.
2. A one-time \$1,500 connection fee must be paid before connection is made to an existing winter water line. If the installation of a new water line is required to facilitate a connection, a down payment of \$750.00 will be required before the new line is installed.

Note: Should a case arise where the cost of installation is excessive due to length, or severe excavation challenges, management reserves the right to reject the application, or negotiate an alternate financial arrangement.

3. In addition to the connection fee, the cottage owner is responsible for the installation cost from the curb stop (main line) to the point of connection. The Property and Development officer will assist with making the necessary arrangements upon request.
4. All installation work is to be done by Donald's Excavating of Browns Flat, NB, according to their specifications in consultation with the Property and Development officer.
5. Once winter water is installed, the cottage owner is responsible for any maintenance and/or repairs required on water and/or sewer lines running from the main lines into the cottage/RV.
6. The annual lot lease fee for year-round water and sewer provision will be as per current rate.

My signature below indicates that I understand and am in full agreement with the above provisions.
